

preserving value

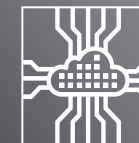

Our mission is to help companies better control their payments processed by leveraging ML technology

Our solution focuses on ease of use, complete customization, visible and shared benefits, while embedding our customer reality

Financial losses

Unique AI Solution

Easy to
deploy & Use

Safe and Secure

Business problem

Companies loose money without knowing

Companies with large number of payments may **lose up to 1%** due to various operational errors, payment duplicates or fraud

64% of companies still rely on manual controls to identify errors in their payments which leads to errors being missed and high operation effort.

Complex payment processes and low digitalization levels are the main factors that drive the leakage rate

Companies are often not even aware of these losses that both impact directly the P&L as well as create a higher exposure to risk.

Our Unique AI Solution helps

With conventional tools and controls companies spend on average 3 to 4 hours per day to look through thousands of transactions to find few errors. This brings high risk and high effort

Our unique AI platform helps companies through its unique prediction model to discover the true errors with much lower effort. **On average we reduce the effort of our clients by 40% day 1**

Our clients save on average up to 500.000 EUR per year using our solution

With continuous use of the platform the AI model is adjusting to each client's own business context

Easy to deploy & Use

Easy plug and play solution for any company irrespective of the industry

A platform created with the end user in mind

Customizable and adaptable to a variety of data formats

A solution that provides valuable insights into your business and your context allowing you to improve your processes.

Secure cloud infrastructure
providing our customers with full
protection for their data

**Some of the largest companies in
Europe** have trusted us with their data

Vetted by cyber security experts

**On premise solution that can be
deployed on customers own**
infrastructure

Safe and Secure
